

Successful Paint Brands Rely on Us

Color Communications Inc. Australasia has been manufacturing colour cards, colour systems and colour marketing tools for more than 30 years.

We have extensive experience in manufacturing a wide range of colour marketing material for the world's leading paint companies. With three production facilities across the world we are leaders in producing high-quality material in a wide range of finishes for all applications including architectural, industrial, woodcare, marine and speciality finishes.

We pride ourselves on the quality of our work. We understand that our clients demand perfectly accurate colours, so that their customers can make the right colour selection. Consumers will not buy paint unless they can choose the correct colour.

Our global network enables us to analyse colour marketing tool trends and to apply them to different markets, giving you the best results for your brands.

Our services include:

- Design and manufacture of colour cards, swatches, fan decks and peel-and-stick;
- Design and manufacture of colour systems;
- Production and inventory control of colour systems;
- Colour Visualizer software;
- Colour consultation and advice on marketing strategy, and
- Graphic design.

Color Communications Australasia Inc. is committed to a better world. All our manufacturing facilities follow strict environmental policies. Our patented, **environmentally friendly water-based paint** is used in more than 95% of our products reducing VOC emissions to a minimum. Paper used in production is sourced from both FSC and PEFC grades.
